Day 1 - Monday, 26 Sep 2022 Sheraton Dammam, Saudi Arabia

08:30 - 10:30 Session 1

Process Safety Incident Investigation Workshop	Empowering Frontline Staff for Sustainable Process Safety Culture Workshop
The workshop objective is to show technical personnel how to perform an objective investigation to determine what happened in an incident and why. The course is oriented to incidents in chemical processing facilities and refineries. The prime objective is to teach the thought processes and methodologies of experienced investigators in determining immediate causes, underlying causes and root causes of incidents. The course will emphasize the key role the investigator plays for complete, accurate and detailed investigations, identifying, communicating and embedding lessons learned.	Frontline staff, such as plant operators, operations specialist, and maintenance craft-persons, should and can take the lead on implementing and improving process safety. For this to happen, site Leadership must see the value in this approach and must support this delegation of responsibility and authority over the long term. Speakers David Moore President & CEO, AcuTech Group William Bridges President, Process Improvement Institute (PII)
Speaker Roger Stokes Principal Engineer, Baker Risk
